

Northern Partnerships

with Edmonton International Airport

LONG-STANDING PARTNERSHIPS

Edmonton International Airport (EIA) is privileged to be the Gateway to the North. Edmonton and communities in Yukon, Northwest Territories and Nunavut benefit from many relationships – business to business, government to government, and community to community. The Edmonton Northern Partnership's vision is to build and strengthen committed relationships between Edmonton and northern communities in order to build relationships, expand trade, foster community and cultural growth and stimulate innovation.

Members of the Edmonton Northern Partnership include the City of Edmonton, Edmonton International Airport, the University of Alberta, Edmonton Economic Development and the Edmonton Chamber of Commerce.

EIA is working with Alberta Health Services and the Government of Northwest Territories Department of Health Services to develop airport processes that reduce the stress for medical-related travel for northern residents and their families.

Further promoting the link between our communities, we also have permanent art displays in the terminal from northern artists and multiple pieces of northern-inspired art, including the interior design of the Renaissance Edmonton Airport Hotel, the four-star hotel attached to the terminal.

REWARDS FOR OUR FRIENDS

EIA offers a special rewards program for our friends in the North. Members of our complimentary loyalty program, *EIA rewards*, who live in northern communities receive four complimentary Plaza Premium Lounge passes (\$160 value) and a special rate at the Renaissance Edmonton Airport Hotel to make connections at EIA an even better experience. All members received monthly discounts on shopping, parking, dining and terminal services and the chance to win monthly flight prizes.

SHOPPING AND ENTERTAINMENT MADE EASIER

With the development of the new 500,000 sq. ft. Premium Outlet Collection EIA (opening Fall 2017) and on-site Costco, shopping and shipping from Edmonton to northern communities will be easier than ever. We are in the midst of discussions with Braden Burry Expediting, Rosenau Transport, Canadian North and others to ship food and goods directly from these new developments to Yellowknife and other communities.

The new Rogers Place and Ice District are forming Canada's largest mixed-use sports and entertainment district. Catch an Edmonton Oilers game or concert, and find even more reasons to visit and enjoy Edmonton.
